PREFACE

The listings in this index were obtained from the microfilms of the 1881 Canadian Census numbered C13282 & C13283 for Manitoba, C13283 & C13284 for the Extensions, and C13286 for East Rupert's Land. This index is structured on the following format within each enumeration area, reading left to right across the index page:

Surname	Christian Name(s)	Number of persons with same surname	Enumeration Area Page	Enumeration Area Household Number
Smith	John	4	26	131

Further the 1881 Census did not include relationship data for each person i.e. mother, father, son, boarder, etc. Each entry had to be treated not as a family but strictly as a household. Most households enumerated had only one surname in them and the first person of that household is mentioned in this index. Where there were two or more different surnames within a household, the first person recorded having a different surname was indexed.

Every person mentioned in the above Census areas has been indexed as best as possible regardless of origin of surname.¹ This index has included native Indians. The basic name structure highlighted in this book has been the traditional European method where the surname is alphabetically indexed first, followed by the christian name(s). However special consideration had to be given to those individuals having:

- a. no surname but having a christian name
- b. a surname but no christian name
- c. a single name not known to be either surname or christian name.

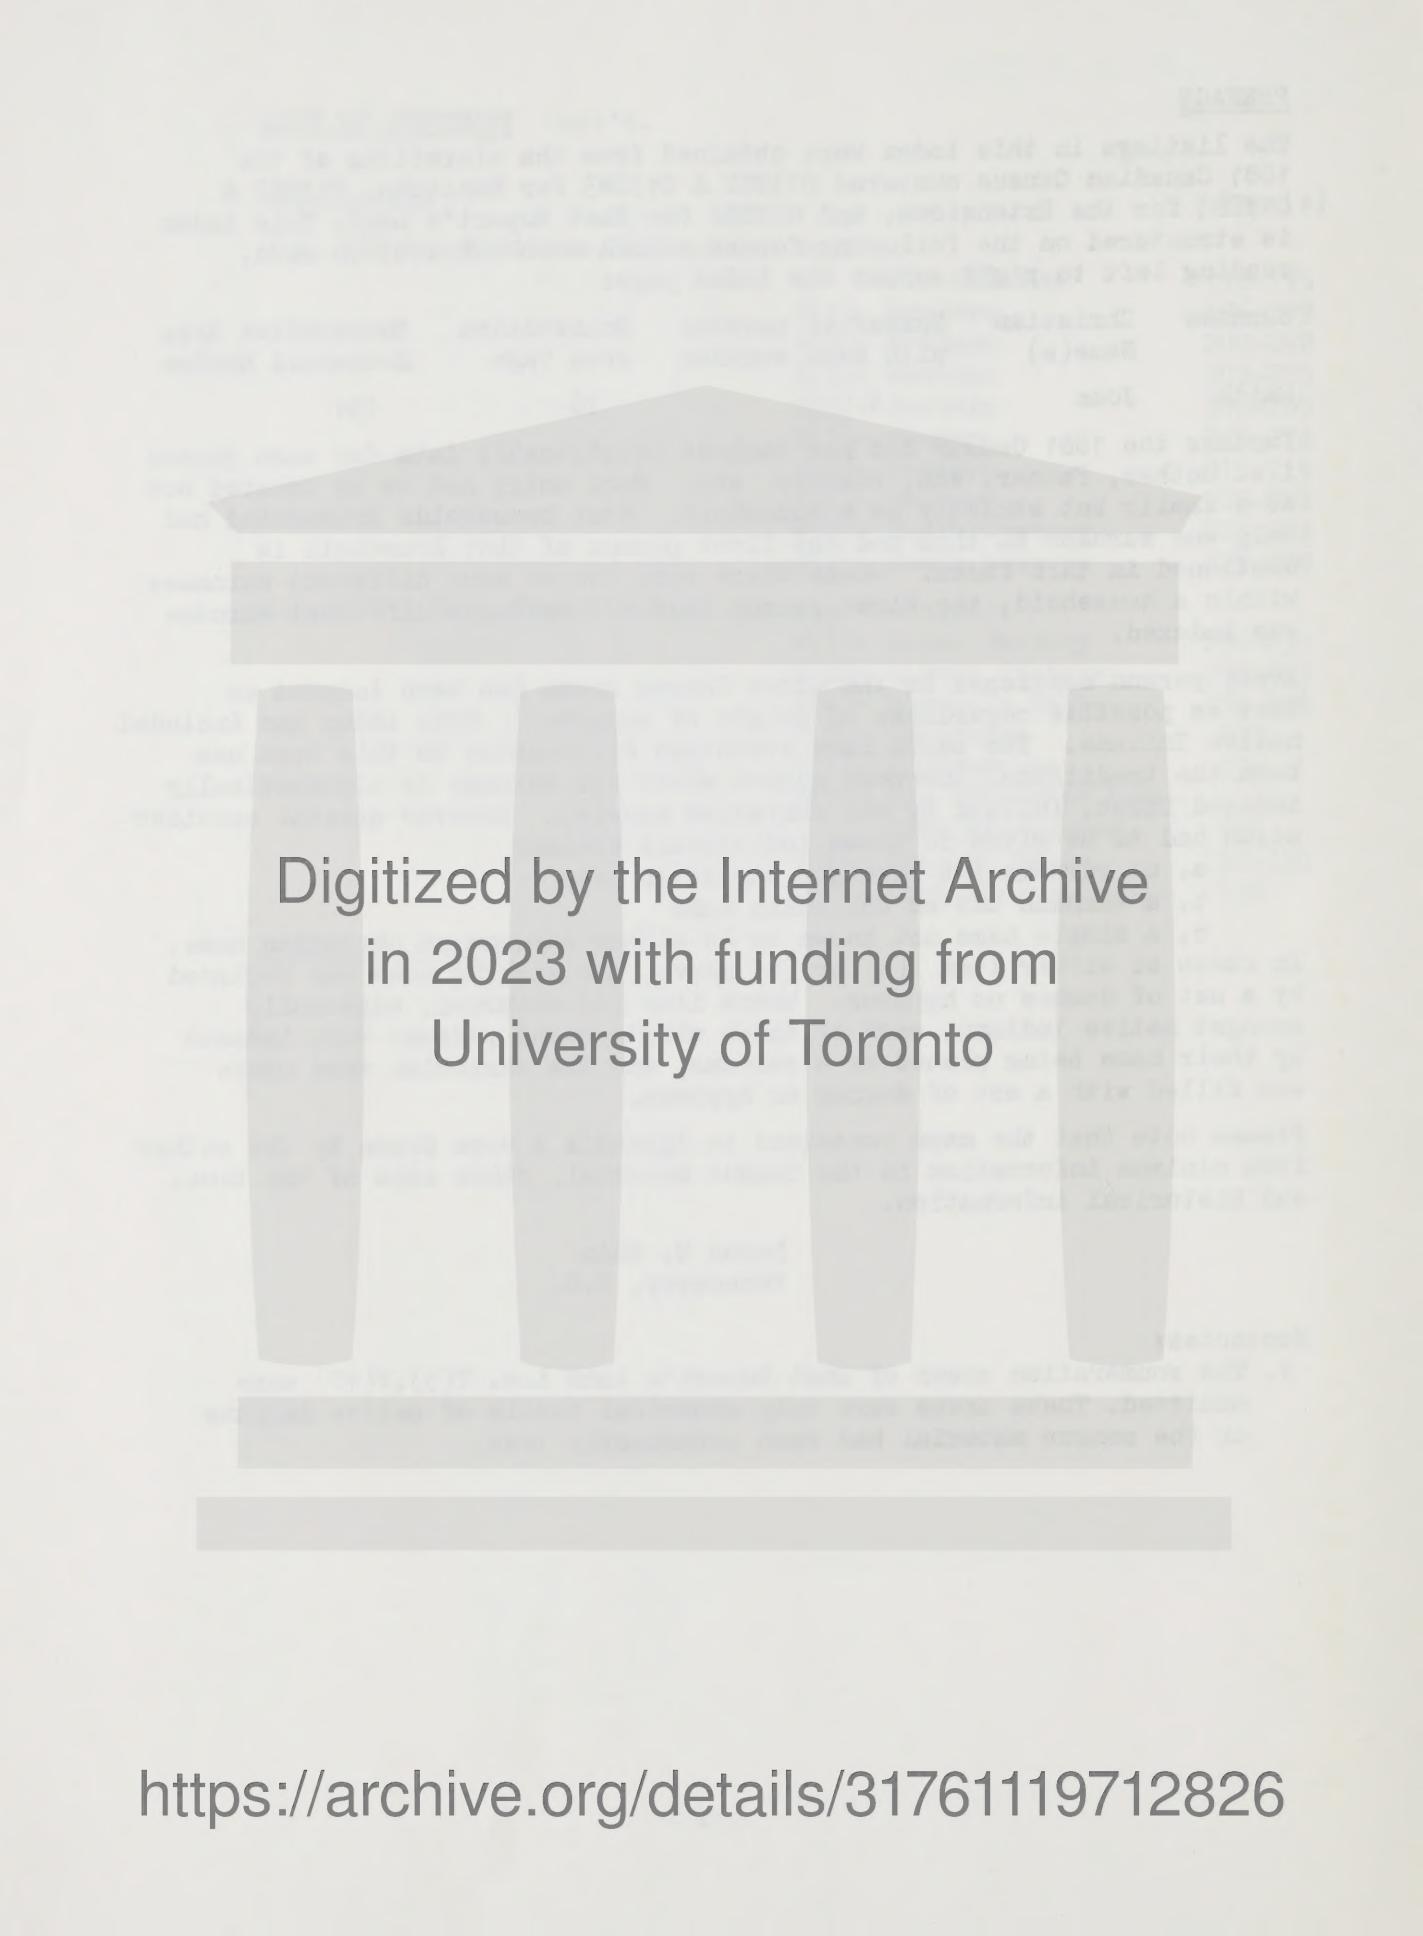

In cases of either item (a) or (b) above, the missing name was replaced by a set of dashes or hyphens. Where item (c) occurred, especially amongst native Indians, each of these single named persons were indexed by their name being placed as a surname, and the christian name space was filled with a set of dashes or hyphens.

Please note that the maps contained in Appendix A were drawn by the author from minimum information in the Census material, other maps of the time, and historical information.

Lorne W. Main
Vancouver, B.C.

Footnotes:

1. The enumeration areas of East Rupert's land i.e. V(3), V(10) were omitted. These areas were only numerical totals of native Indians or the census material had been permanently lost.
